To whom it may concern,

Subject: NZIBS Diploma in Building Surveying

Vertical Horizonz is an Australasian based world-wide training organisation, holding both Registered (RTO) and Private Training Establishment (PTE) registration within both Australian and New Zealand Qualification Frameworks. Vertical Horizonz also maintains an International Standards Association (ISO 9001) accreditation.

The New Zealand Institute of Building Surveyors (NZIBS) is a New Zealand based training provider, committed to providing educational opportunities at the cutting edge of construction industry requirements.

Vertical Horizonz New Zealand (VHNZ) has partnered with NZIBS since 2016 to provide external quality assurance activities related to the provision of the NZIBS specialised Diploma in Building Surveying (Level 6). VHNZ undertook the mapping of the NZIBS offering to establish its alignment with the NZQA definition for a Level 6 Diploma. While the NZIBS Diploma is not NZQA approved, it is recognised as a valid education pathway from the NZQA approved New Zealand Diploma in Building Surveying (Level 6) [Ref:3030].

The processes, presentation and standards of the NZIBS Diploma are audited on an annual basis by VHNZ to ensure compliance both with ISO 9001 standards and the quality expectations of the above certification. NZIBS received a positive audit report from VHNZ following their annual audit completed October 2024.

The NZIBS Diploma (Level 6) programme currently, and consistently, meets the above standards and expectations.

Kind regards

Evelyn Moody
Chief Academic Officer
